

SwimStrong Dryland Supplement Suggestions by Brand

Refer to the *Supplements For Swimmers to Consider* (doc) and *Can Supplements Benefit Swimmers?* (article) for more information and what to look for. Please note, supplements are meant to be just that – a SUPPLEMENT to a whole-food, varied diet. Focus on the appropriate quality and quantity of your food BEFORE you consider incorporating any supplement. The less you supplement, the better. Lastly, make sure to always consult your doctor before starting any new supplement. Every athlete is unique in the type of supplements that may be needed, as well as dosing.

All of the supplements listed below are certified by either NSF for Sport (National Sanitation Foundation), Informed-Sport, or Banned Substance Control Group (BSCG). Those with a "Nutrition Facts" label are not considered supplements and are regulated by the FDA.
