

Sleep Like A Champion

What does a swimmer's day look like?

- Morning practice
- School
- Afternoon practice
- Dryland
- Homework

Swimmers don't
need to be told
how much demand
is put on their body
every day

Everyone knows
sleep is important

How does
sleeping help
you as an
athlete?

2 Major Hormones:

- Growth hormone
- Thyroid-stimulating hormone

Impact of Sleep

- Decreased heart rate & breathing
- Strengthens your immune system
- Repair & restoration

How much sleep do athletes need?

- 10 hours = Optimal
- 9 hours – Pretty good
- 8 hours - Minimum
- TIME MANAGEMENT

Impact of Sleep on Athletic Performance

- Basketball shooting accuracy increased 9%
- Tennis serve accuracy increased ~6%
- Improved mood
- Decrease in fatigue

Impact of Sleep on Swimming Performance

- 15-meter sprint - .51 faster
- .15 faster reaction time off the block
- Flip turn speed .10 faster
- Increased kick stroke by 5 kicks

Your Competition:

- Practices
- Does dryland
- Eats
- Drinks
- Sleeps

How does lack
of sleep impact
you?

Impacts of sleep restriction:

- Faster time to exhaustion
- Decrease in average & peak power during Wingate
- More noticeable in submaximal efforts due to repetitive motions

Impacts of sleep restriction:

- Time to exhaustion reduced by 11-20%
- Muscle glycogen decreased = less energy for your race
- Reaction time decreases

Sleep Hygiene

1. Go to bed at the same time each night
2. Have your room as dark as possible
3. Have your room at a cooler temperature (60-67*)

Sleep Hygiene

- 4. Use your phone as little as possible in the hours leading up to bed – Use Night Shift mode
- 5. Avoid caffeine starting 6 hours before bedtime
- 6. Deep belly breathing

Sleeping for Meets in different Time Zones:

- West to East
- East to West
- Adjust sleep schedule for the zone you're going to

Getting sleep the night before a meet:

- Deep breathing
- Spend more time on recovery modality of choice
- What can get you relaxed?

I hope you all sleep
like this koala
