

How You Show Up: Character

Senior Leadership Meeting: January 2025

Follow up from November's Green Team Task / Open Discussion

- If you had your team meeting share how it went!
- Anything else you would like to bring up regarding leadership?

Team Leadership Assessment Pt 2

- <https://forms.gle/5HzxRxvDkZWgXWGH7>
- Honestly Rate Your Team
- After Everyone has submitted, show results compared to October
 - We will do this one more time in April

Mental vs Moral Character

Moral Character speaks
to your Integrity

Mental Character speaks to
your performance & work ethic

- Maturity
- Respect
- Positivity
- Accountability
- Responsibility
- Self-Awareness

SPECIAL

- Drive
- Discipline
- Passion
- Consistency
- Work Ethic
- Resiliency

Software Updates

Software Update

iOS 9.0.1 can update automatically between 1:00 - 5:00 AM while connected to power.

Install Tonight

Remind Me Later

- Our Phones Constantly need Software & IOS (Individual Operating System) updates
- In 2011, Apple averaged 6.75 IOS updates per year... it is now over 15 per year
- Why?
 - Rising Complexity of Phones
 - Too Much Change & Activity
 - There has never been a moment in time where delivering your best today is not paramount

Software Updates

- **IOS** - Individual Operating System
- **Software Update** - a removal of bugs and addition of updates designed to enhance the current IOS
- **Bugs** - an error, flaw or fault in one's IOS that produces an unexpected result or causing one to behave in unintended ways
- **Notifications** - a prompting or reminder from yourself or others suggesting an update
- **Incompatibility** - two things so different in nature they are incapable of coexisting
- **Software Upgrade** - a complete change of the current IOS to a new and improved IOS
- **Hardware** - the physical exterior one presents or portrays to others
- **Software** - the inner-workings of who you are that drives what you do

Software Updates

- Anytime a company updates a system they usually consider:
 - What are other people seeing? (Customer reviews)
 - What am I seeing? (Internal evaluations & assessments)
 - What do I want to see? (Vision-casting)
- **Note:** this is not a “talent” update pertaining to the sport, these are updates pertaining to how you are as a teammate, a person, a friend, family member, etc - Your CHARACTER

Software Updates

1. What are other people saying or seeing?

Similar to a company assessing what others are saying, i.e. “consumer reviews & feedback”; we’ll do the same here as it relates to those around us.

Spend 2-3 minutes and list out a minimum of three bugs and/or desired updates that others (family members, teammates, coaches, friends) have shared about your character as a person, teammate, or leader.

Write these 3 or more bugs or update down.

Software Updates

2. What are you seeing?

You know your IOS better than anyone, it's yours.

Spend 2-3 minutes and list out a minimum of three bugs and/or desired updates you would like to see removed and/or updated about your character as a person, teammate, or leader.

Write these 3 or more bugs or updates down.

Software Updates

3. What do you want to see?

Think BIG for these responses

Spend 2-3 minutes and list out a minimum of 3 bugs and/or desired updates of your performance as a person, teammate, or leader you would love to remove forever and/or become incredible in.

Write these 3 or more bugs down and/or desired updates.

Software Updates

Now that each person has listed out their bugs and updates for each of the 3 areas, we're going to try to narrow down the list to 2 bug removals and 2 updates.

Tips for Choosing Which Bugs to Remove/ Updates to Implement:

- **Is there any overlap/incompatibility?**
- **Is there potential harm with this bug?**
- **Is there an ability to dramatically improve your performance?**

Software Updates

In order to ACTIVATE the update, we must:

1. Give your teammates/ classmates a NOTIFICATION that an update is happening
2. Give yourself a NOTIFICATION each day to commit to spending 5-10 minutes each day reading, listening, or watching something on each bug or update to help you build additional momentum around the update.
3. Strategize & implement environmental changes that could be made to better support your update.

Software Updates

- You only need to get 1% better
<https://www.youtube.com/watch?v=GeFjP5sMXr0>
- 1% Better everyday for 365 days = ~40% increase in skill level in that area
- Don't try or worry about climbing the mountain today, just take one more step forward in the right direction.

January Green Team Task

- Individual Activity
 - Follow through with the updates & bug removals you have chosen for the next 7 days
 - Set a reminder in your phone for a week from now and mark your results as:
 - Successfully updated
 - Next Step: Move to new update if necessary
 - Still processing
 - Next Step: continue rolling out update
 - Update failed
 - Next Step: choose an easier update to do next week, then revisit

January Green Team Task

- Team Activity
 - Explain Software Updates to the team
 - Challenge Teammates to do their own and circle back with the group a week later to see who was successful in their update.
